

**YOU DESIGN IT.
WE BUILD IT.**

Your Product Isn't the Constraint. Capacity Is.

You own the product. We provide the manufacturing capability to help you meet changing demand without disrupting your operations or timelines.

ATS Repetitive Equipment Manufacturing (REM) is the contract manufacturing division of ATS Corporation, specializing in the production of medium to high-complexity equipment for OEM's across Life Science, Industrial and Commercial markets. We manage manufacturing, procurement, quality, and supply chain execution, allowing you to scale production while retaining ownership of your product, intellectual property, and customer relationships.

*Designed for **repeatable production**, not one-off or engineer-to-order builds.*

When does ATS REM make sense?

As your business grows, manufacturing becomes more complex. ATS REM provides a scalable manufacturing solution when:

- Demand is exceeding internal production capacity
- Your product is transitioning from prototype (alpha/beta) to repeatable production and requires engineering or manufacturing support
- Growth opportunities are being limited by manufacturing bottlenecks rather than product demand
- Engineering teams are spending more time supporting production than developing next generation products
- Lead times are increasing
- Manufacturing space or labor is limited
- Supply chain management is becoming more complex
- Manufacturing expansion requires significant capital investment

How ATS REM Works: ENGAGE. MAKE PERFECT. REPEAT.

This repeatable process enables consistent quality, predictable delivery, and scalable production while reducing operational burden on your organization.

4 Reasons OEMs Partner with ATS REM.

ATS REM specializes in repeatable production for OEMs that have outgrown in-house manufacturing but don't fit the traditional high-volume contract manufacturing model.

REPEATABLE

Every unit built the same way, every time.

SCALABLE

Meet demand with no new facilities or headcount.

COMPLIANT

Reduced risk as quality scales with production.

INTEGRATED

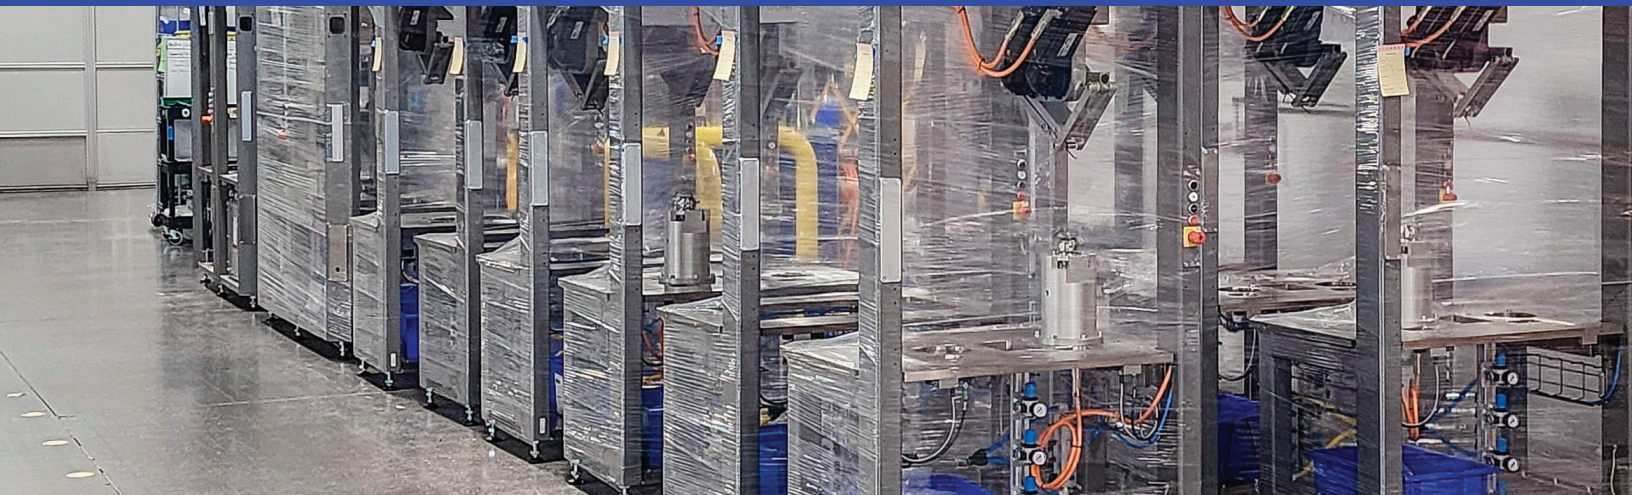

One partner, fewer handoffs, one point of contact.

PROVEN PERFORMANCE

98.8%
on-time
delivery

35%
total-cost-of-ownership
reduction in 700+
unit programs

45+
years of automation
experience

Consistent Results Across Repeated Builds.

ATS REM partners with OEM teams to **ENGAGE** early, **PERFECT** every build through disciplined manufacturing processes, and **REPEAT** production with the quality, consistency, and delivery performance needed to support long-term success.

Ready to Scale Production?

Whether you're preparing for growth, expanding production, or looking for a trusted manufacturing partner, ATS REM can help you scale with confidence while maintaining ownership of your product, quality standards, and intellectual property.
